

Random Objects from Direct Observations Drawing

- This assignment is for March 26th- April 3rd of our extended school cancellation. You will draw one additional item per day.
- You will therefore draw 7 total items for this assignment.
- You are required to send me verification each day that you are working on this assignment. You will lose 2 points for each day you don't do this. This can be a photo taken each day with a phone and then emailed to me. If you can't do this due to phone issues, you can email me each day and tell me what you drew that day. My email is elana.brownfield@lisbon.k12.oh.us OR elana.brownfield@omeresanet.net

DO FIRST--Video Instruction

- First watch this 6 min. video to learn the basics of how to draw objects from direct observation:
 - <https://www.youtube.com/watch?v=bobGvAVQT6g>
 - You can also do a search on youtube.com for “How to Draw Objects by Linescapes”
 - The better you get each day, the more complex the object you can choose to draw.
 - I will give feedback to you as you send me your photos each day.

Draw one new item for each day of missed school (starting on Thurs March 26th)

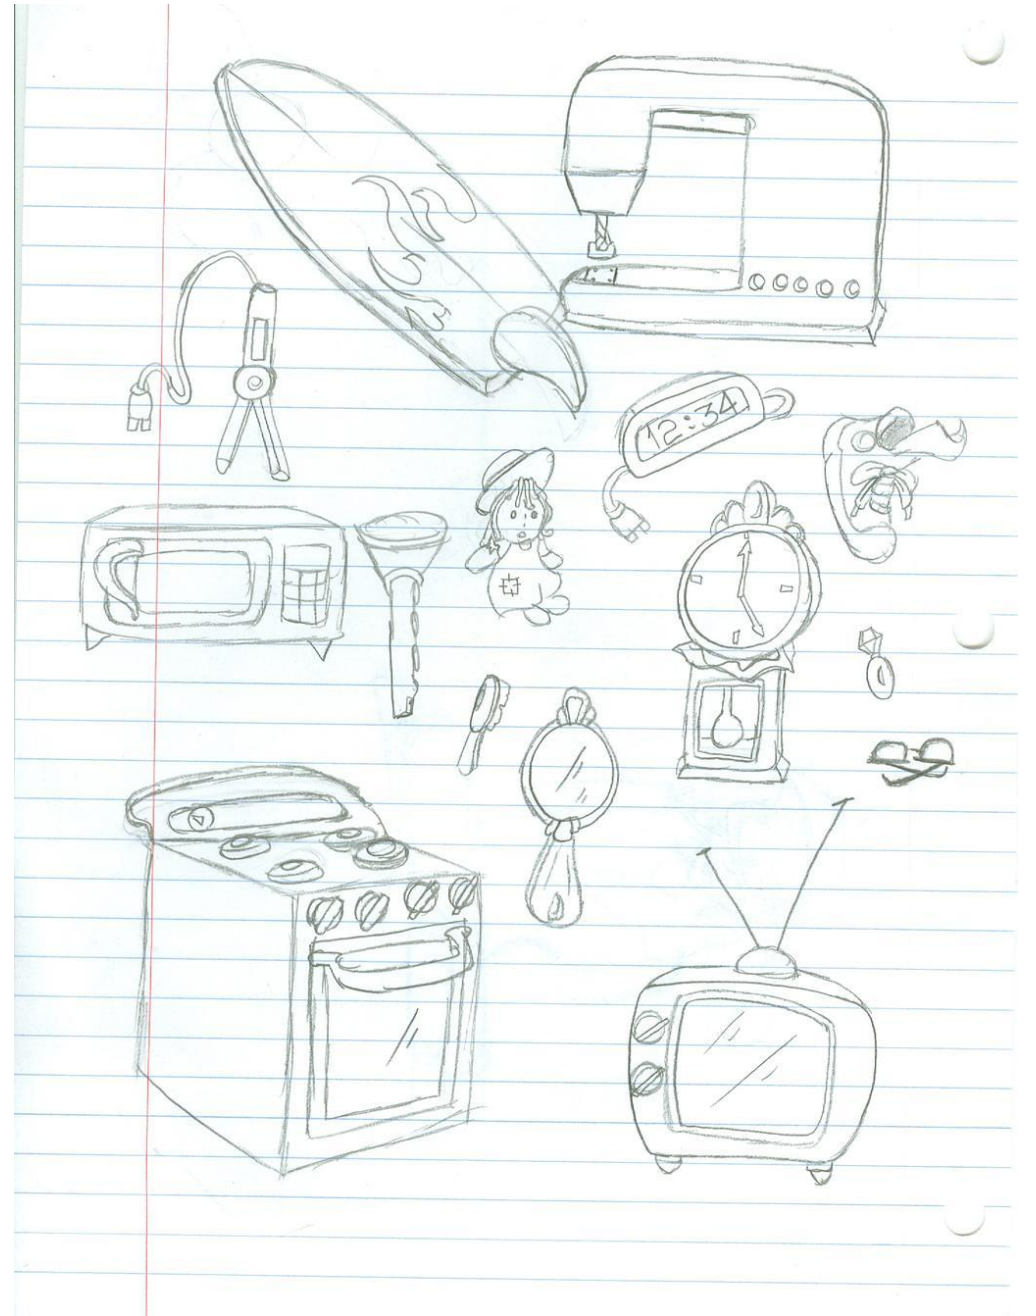

Draw items from
direct observation!
Not from a photo
and not from your
memory or
imagination.

Use pencil first. You may then trace over with marker or pen if you would like.

Try to use plain white paper. However, if you absolutely must use lined paper you will not lose points.

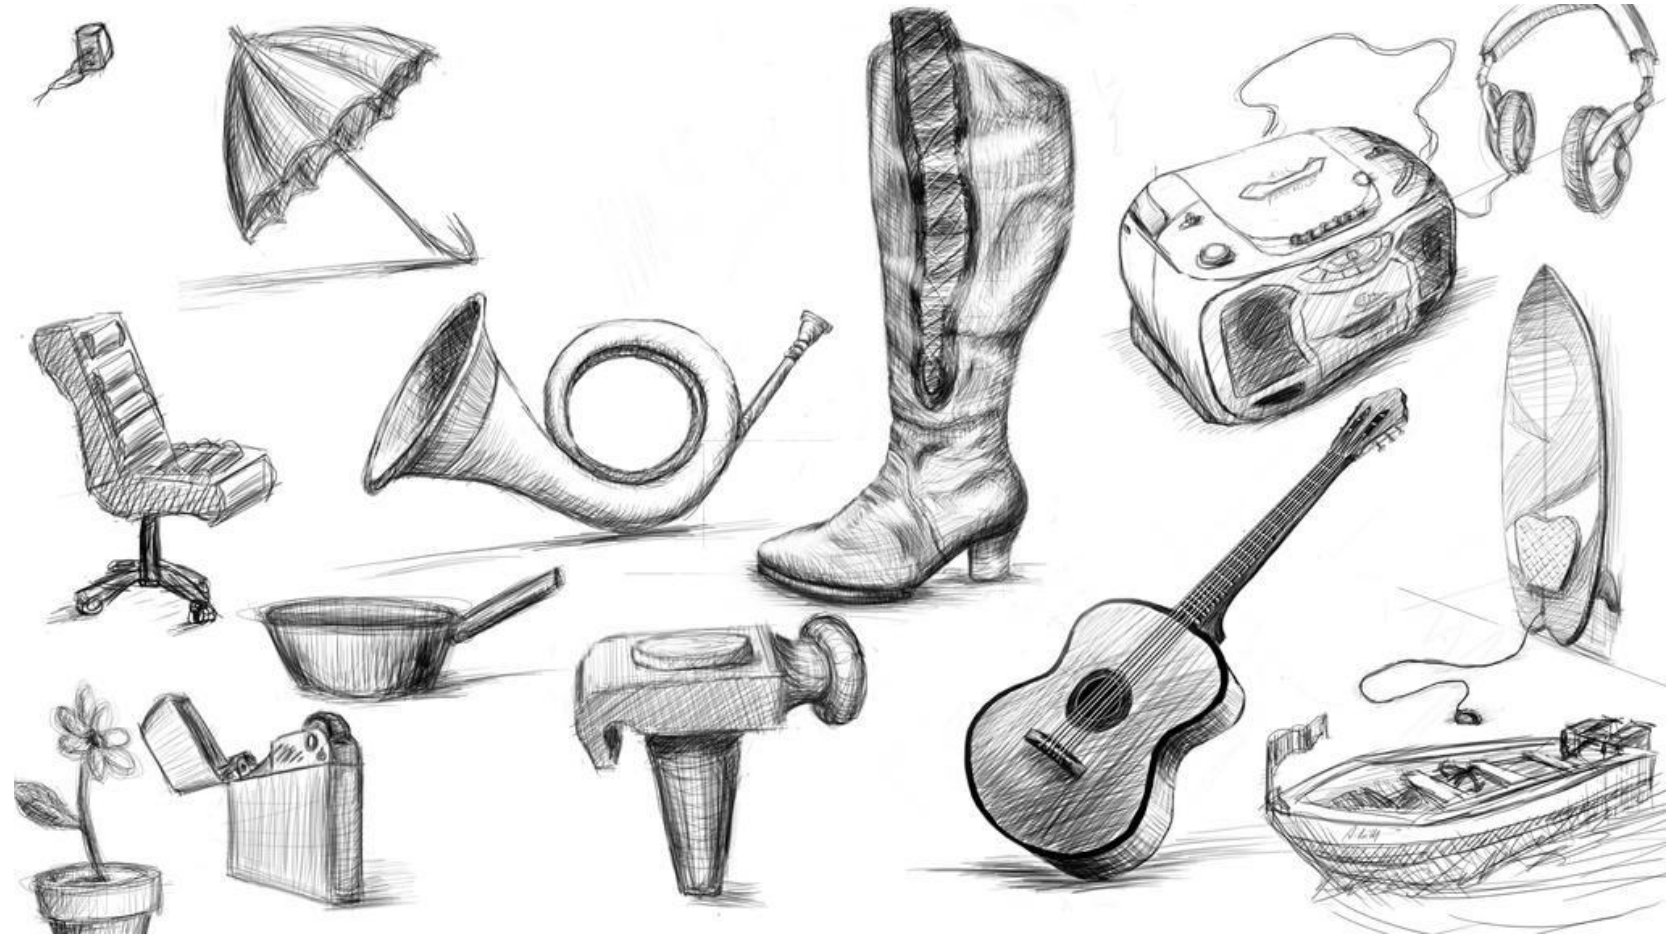

You can overlap items to make more items fit on your paper. You may also start a new piece of paper or draw on the back if you run out of room.

Your grade will be based on overall effort shown.

Adding shading to your objects is optional but does show more effort.

Overall complexity of objects drawn will also be taken into consideration towards the amount of effort you put forth. All examples shown in this slide show demonstrate an acceptable level of effort for this assignment.
